

SEV SCALABLE ENTRY VEST

The PROJECT7 **SCALABLE ENTRY VEST** (SEV) is uniquely designed to scale from a full coverage entry vest for high risk operations, to an enhanced plate carrier for rural or linear missions. SEV is scalable by the addition or removal of its Yoke, Upper Arm Protectors, Throat Protector, and Groin Protectors. SEV is a “soft armor first” system which utilizes soft ballistic armor as its primary coverage, yet features top loading front and rear rifle pockets for the installation of 10”x12” or SAPI sized rifle plates. SEV is available in 15 platform sizes as well as 8 cummerbund sizes, providing 120 possible combinations for an ideal fit.

KEY FEATURES

Key features for **SEV** include:

- Flexible, athletic design to provide full range of motion, allow normal shooting positions, and give unprecedented comfort in a full coverage vest
- Elasticized, removable yoke to provide normal, full range shoulder motion
- Rapid scalability from enhanced plate carrier to full coverage entry vest in seconds
- PROJECT7’s “Structured-Texture” shoulder design provides a soft, natural, and high friction shooting platform unencumbered by buckles, straps, external pads, or overlapping armor
- Patent pending, Three-Piece Cummerbund (3PC) design for operator specific sizing, ideal weight bearing, with broad adjustability, and rotational flexibility for unrestrained movement
- Internal radio routing channels with eleven separate openings to eliminate cables on the surface of the platform
- SAPI based hard armor coverage sized to the individual operator provides greater protection, even for larger operators
- Angular Webless MOLLE/PALS load bearing surfaces built from Blue Force Gear Ultracomp for increased strength and decreased weight
- Bar tacked anchors for the installation of PROJECT7 ILB Packs and 1PS Single Point Slings
- First-Spear Tubes or one-way hook and loop closure systems
- User replaceable cummerbund and upper arm elastic
